Chemical engineer with a dual masters in mathematics and scientific computing. Ph.D. student in the Computational Modelling group at the University of Cambridge, studying stochastic methods for solving population balance equations.

Experience

Work experience.....

- **University of Cambridge**
Ph.D. Candidate in Chemical Engineering and Biotechnology

Develop Monte Carlo methods (in-house code written in C++) to solve population balance equations for studying combustion synthesis of inorganic nanoparticles. Proposed reactor model for titanium dioxide synthesis and numerical algorithms to improve performance of the stochastic solver under industrial conditions.

Cambridge, United Kingdom
2015–2019
- **Helmholtz Zentrum Dresden Rossendorf**
Intern in Experimental Thermal Fluid Dynamics

Developed 1D, dynamic, multicomponent model for a slurry bubble column reactor for Fischer-Tropsch synthesis.

Dresden, Germany
2014
- **Mintek**
Graduate Engineer in Measurement and Control

Researched viability of thickener control. Documented models developed for the in-house control framework (written in C++). Contributed to on-site testing and data analysis for a flotation reagent controller.

Johannesburg, South Africa
2013
- **Mintek**
Engineering Intern in Measurement and Control

Developed a temperature-dependent amperometry model for inclusion in a commercial cyanide measurement device.

Johannesburg, South Africa
2011–2012

Teaching experience.....

- **University of Cambridge**
Supervisor for Partial Differential Equations Course

Small-group teaching and tutorials for students in the Part IIA year of the Chemical Engineering Tripos.

Cambridge, United Kingdom
2019

Academic qualifications

- **Churchill College, University of Cambridge**
Ph.D. Chemical Engineering

Thesis using stochastic techniques to model combustion synthesis in joint industrial project with Venator for better understanding of the titanium dioxide process. Some research work conducted at the Cambridge CARES facilities at the National University of Singapore.
Supervisor: Prof. Dr. Markus Kraft.

Cambridge, United Kingdom
2015–Current
- **Technical University of Berlin (TUB)**
M.Sc. Scientific Computing, 1.2, "Sehr Gut"

Coursework covered control theory, differential algebraic equations, optimal control of partial differential equations, and model order reduction. Thesis on convergence of stochastic coagulating particle systems with Weierstrass Institute of Applied Analysis and Stochastics (WIAS).
Supervisors: Dr. Robert Patterson (WIAS) and Prof. Dr. Wolfgang König (TUB, WIAS).

Berlin, Germany
2014–2015

- **Royal Institute of Technology (KTH)** **Stockholm, Sweden**
M.Sc. Mathematics, A, "Excellent" *2013–2014*
 Coursework covered stochastic differential equations, parallel and high-performance computing, fast numerical algorithms, mathematical modelling, finite element and finite volume methods, and non-linear optimisation.
- **University of Cape Town (UCT)** **Cape Town, South Africa**
B.Sc. Eng. Hons. (Chemical Engineering), First Class *2009–2012*
 Coursework included mathematics, physics, chemistry, thermodynamics, numerical methods, process design, modelling, and control, and post-graduate level coursework in optimisation. Honours project modelling Fischer Tropsch synthesis. Supervisor: Prof. Dr. Klaus Moller.

Technical and personal skills

- **Programming languages:** MATLAB/SCILAB, PYTHON, and C++. Basic proficiency with MPI/OpenMP and parallel programming.
- **Simulation software:** ASPEN HYSYS, COMSOL MULTIPHYSICS, WALBERLA (Lattice-Boltzmann solver for fluid dynamics).
- **General:** Linux, Microsoft Windows, L^AT_EX, Git.

Interests and extra-curricular activity

- **Cambridge University Ballet Club** (2015–2016, 2018–2019). Performed in Don Quixote, 2019.
- **Churchill College Boat Club** (2015–2016, 2018–2019). Rowed in women's second boat, 2015–2016. Sub for women's first and second boats, 2018–2019.

Publications

- **Boje, A.**, Akroyd, J., Kraft, M., 2019. A hybrid particle-number and particle model for efficient solution of population balance equations. *Journal of Computational Physics*, *in press*. doi: 10.1016/j.jcp.2019.03.033.
- **Boje, A.**, Akroyd, J., Sutcliffe, S., Edwards, J., Kraft, M., 2017. Detailed population balance modelling of TiO₂ synthesis in an industrial reactor. *Chemical Engineering Science* 164, 219–231. doi: 10.1016/j.ces.2017.02.019.

Conference talks

- **Boje, A.**, Akroyd, J., Kraft, M., 2018. Numerical study of the evolution of particle size and morphology in an industrial titanium dioxide reactor. American Institute of Chemical Engineers (AIChE) Annual Meeting.

Conference posters

- **Boje, A.**, Kraft, M., 2017. Computational study of temperature effects in TiO₂ synthesis in an industrial reactor. Cambridge Particle Meeting.

Achievements

- **Cambridge University Ph.D. Studentships** *2016–2019*
 Cambridge Centre for Advanced Research and Education in Singapore (CARES)
 Chemical Engineering and Biotechnology Department
- **COSSE Double Masters Programme** *2013–2015*
 Erasmus Mundus Scholarship

- **Mintek** *2011–2012*
Undergraduate Bursary
- **University of Cape Town, Faculty of Engineering** *2009–2012*
Entrance Scholarship (2009), Dean's Merit List (2010–2012)
- **Independent Examinations Board (IEB)** *2008*
Top 40 IEB Matriculants in South Africa
- **Our Lady of Fatima Convent School** *2008*
Matric DUX student and subject trophies: English, Afrikaans, Bilingualism, Physics, Biology, Mathematics and Physics, History, Life Orientation
- **Kwa-Zulu Natal Youth Dance Company** *2006–2008*
Provincial ballet dancer.

Languages

- **First language:** English
- **Intermediate proficiency:** Afrikaans
- **Basic proficiency:** Italian (A1&2 CEFR)
